GREAT the IMI Way

IMI Interativa Services

The IMI Interativa Services aims to offer any support the customer needs in all phases of a project and enterprise.

More important than having a new product is to keep it in good condition and functioning, always having a quality technical support, guiding and giving all necessary support for the maintenance or repair of the equipments.

Check out the GREAT services offered by IMI Interativa to help you and your project.

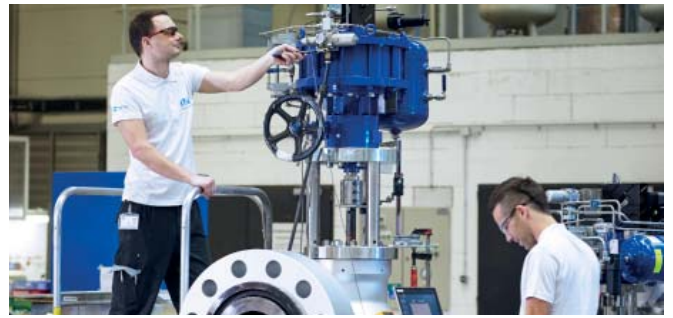

Main Services

Start-up following

We follow-up the start-up in site guiding our customer at the beginning of its operation, ensuring a safe start and operations of our products.

Valves maintenance

Corrective and preventive maintenances for several customers from different markets, ensuring full operation.

Restauration

Full recovery of IMI Interativa valves, ensuring the same looking and performance of a new product with great cost x benefits.

Training

We have a Commercial Technical Staff able to train and attend to inquiries and requests from our customers about applications, installation and maintenance of our equipments, ensuring great performance and durability.

In site maintenance

Specialized technical service in maintenance of our equipment in site, instructing the customer team how to proceed in cases of intervention / unplanned maintenance focused on problem solving and maintenance in the shortest time and the best possible conditions.

Third valves exchange

For the third valves manufacturers, we have a special condition on an exchange basis, replacing the used / damaged parts by a new equipment with the same technical configurations and warranty.
